Introduction to Mentorship Program

Nguyen Thanh Huy

How does mentorship program work?

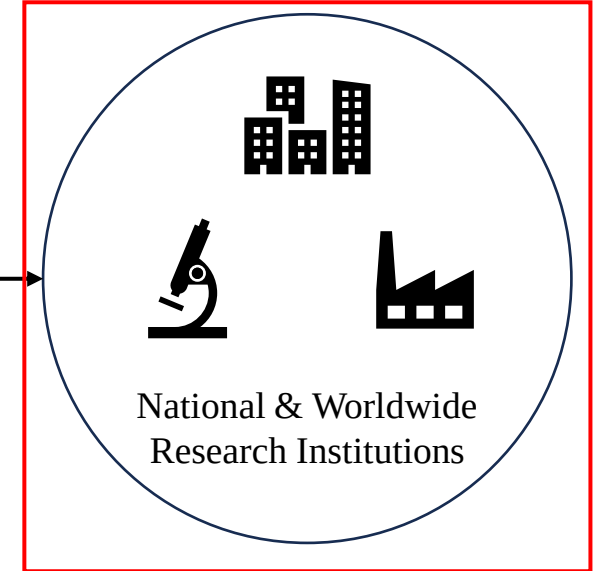

AIO Members

Research Mentorship

Project Collaboration

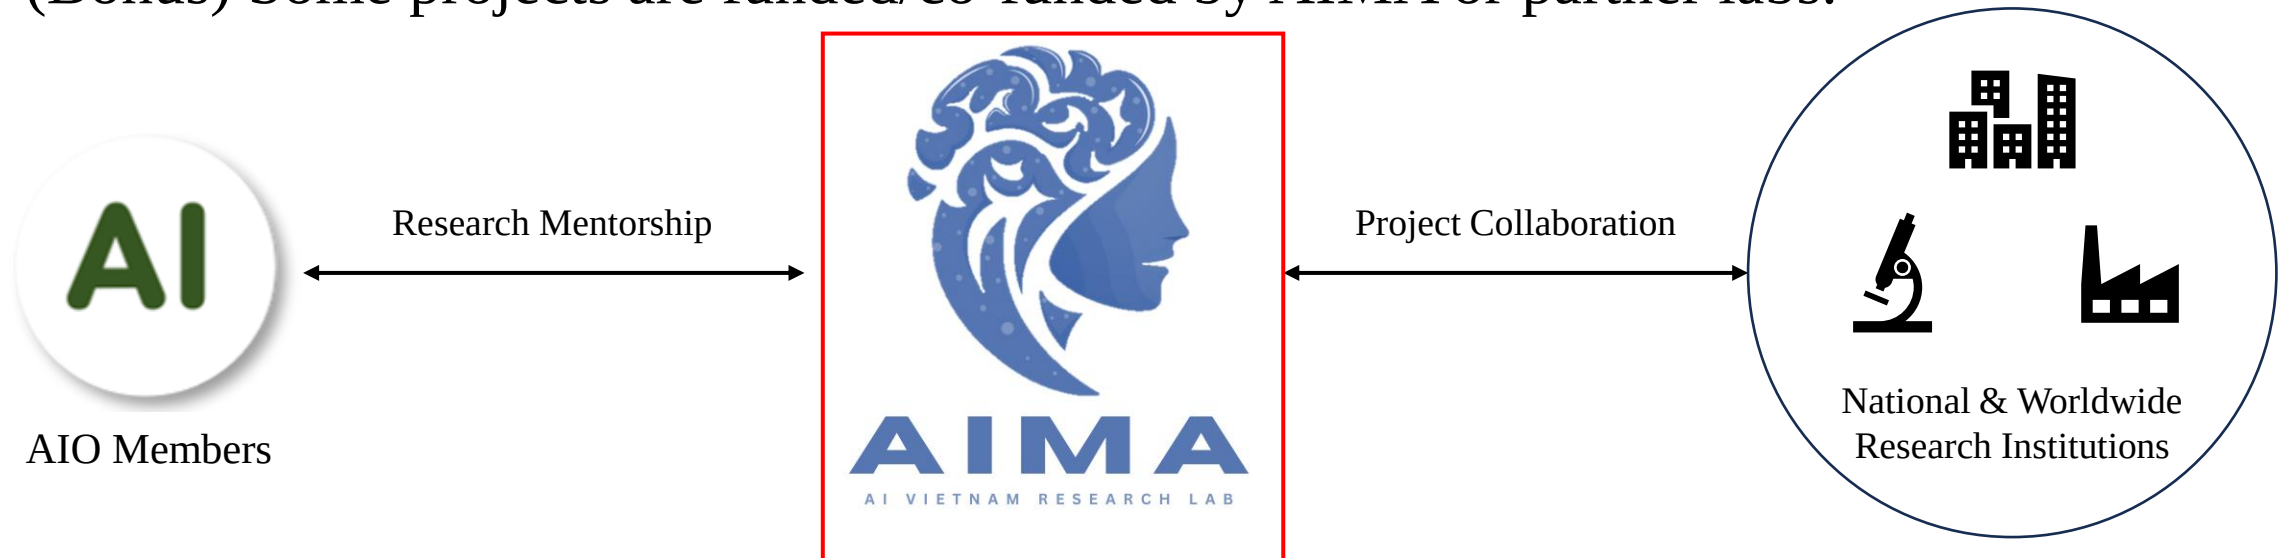

National & Worldwide
Research Institutions

How does mentorship program work?

AIMA Roles:

- ❖ Collaborating with domestic and international research labs and institutions in publishing papers by doing projects.
- ❖ Mentoring AIO members in working on research projects including: training research mindset, guiding to write scientific papers, exploring personal research directions,...
- ❖ Supporting GPUs, paper registration fees, recommendation letters,...
- ❖ Offering and referring private RA/MSc/PhD opportunities and scholarships.
- ❖ (Bonus) Supporting in refining study/career profile (CV, motivational letter,...)
- ❖ (Bonus) Some projects are funded/co-funded by AIMA or partner labs.

How does mentorship program work?

AIO Member Roles:

Attitudes:

- ❖ Defining yourself as AI researcher, not AI engineer.
- ❖ Being active, self-motivated, highly disciplined and consistent while doing research.
- ❖ High commitment in doing research projects and contributing to the research community

Technical skills: Solid coding ability is all you need

- ❖ Be able to debug, reimplement, and reproduce the existing codebase.
- ❖ Be able to build on top of the current code with new design mechanisms/modules.
- ❖ English, Math, Research domain, and research mindset are the plus (but not required).

Seminar Schedule

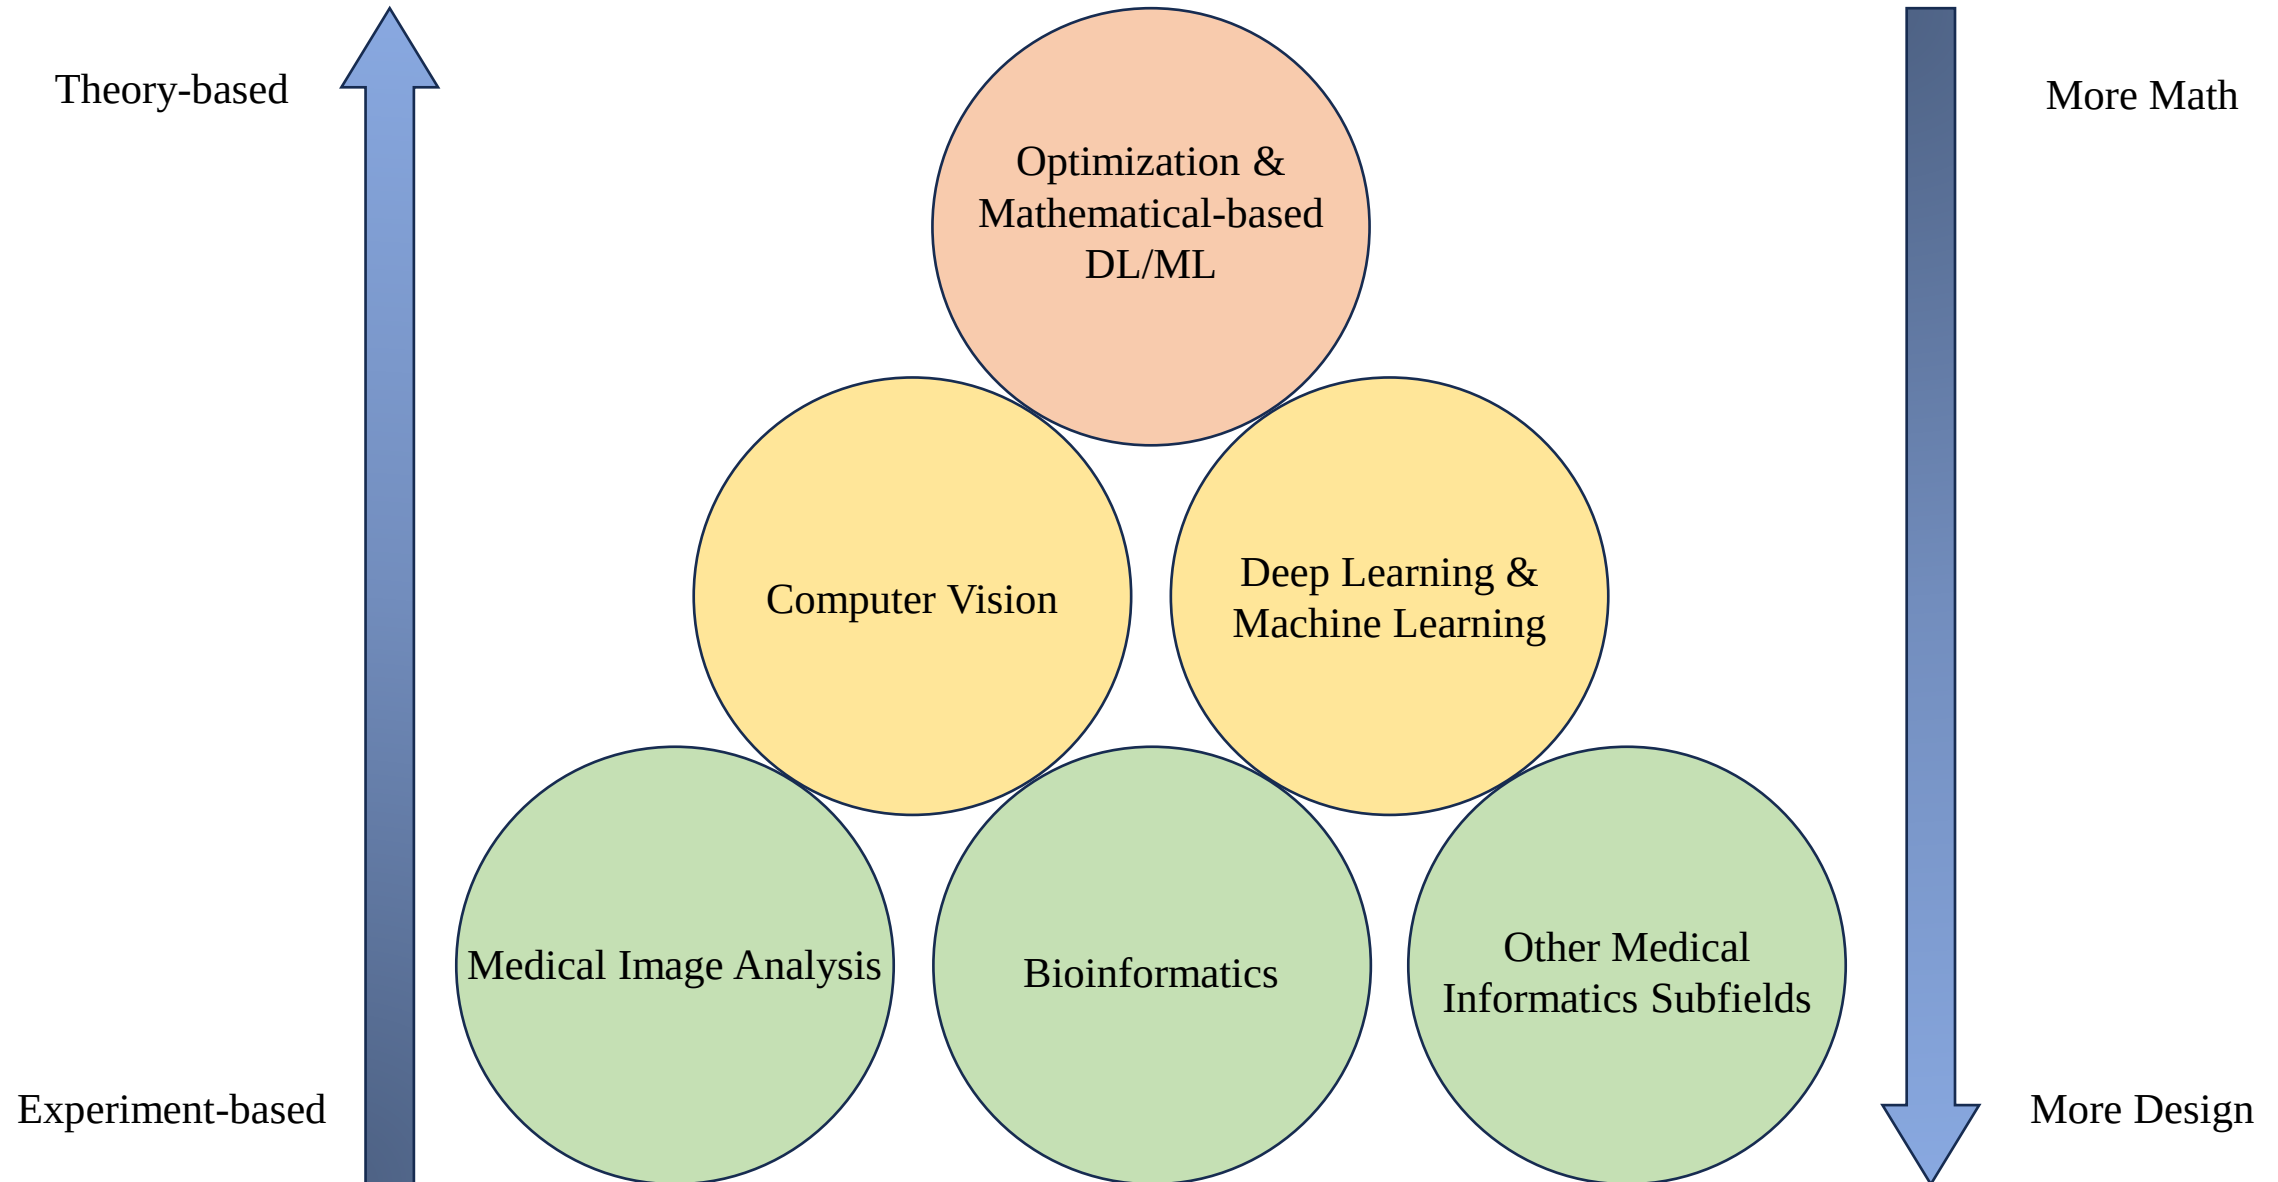

Nguyen Thanh Huy

Schedule

*** Timetable:** Every Monday at 20:00

Title	Presenter
Title: Delving into Semi-Supervised Medical Segmentation	Thanh-Huy Nguyen - Research Fellow at Nanyang Technological University, Singapore - MSc at Université de Bourgogne, France
Title: Introduction to Domain Generalization and DomainBed	Dinh-Quan Nguyen - Lecturer at PTIT, Vietnam - MSc at Cleveland State University, US
Title: Exploring Techniques in Disease Classification from MRI Images	Vu Mai Anh - PhD student at University of Houston, US - MSc at HCMUS, Vietnam
Title: Multi-label Breast Cancer Detection using Mammograms	Kha Quang Hien - PhD Candidate at Taipei Medical University, Taiwan
Title: Radiomic Application in Diagnosis	Kha Minh Bao - Undergraduate AI Researcher at Bioinformatics Institute - A*STAR, Singapore

Seminar Content

Objectives

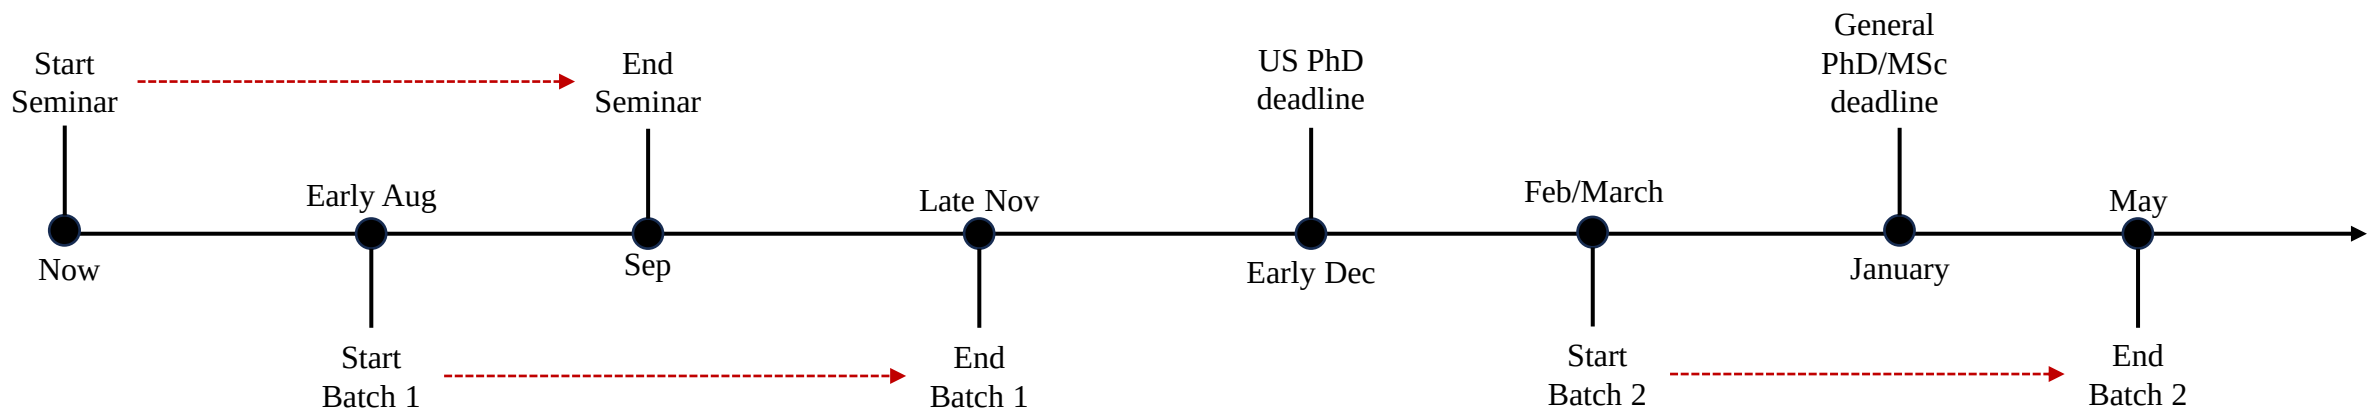

Nguyen Thanh Huy

Objectives

Mentorship Program

- Duration: Minimum 5 months (1/3/1 month(s) for training, doing project, writing paper)
- Estimated time per week for research project: From 15 hours to 30 hours
- Expected Output: Paper rank A & A* and Journal Q1, Q2
- Timeline:
 - Batch 1: From early August 2024 to December 2024.
 - Batch 2: From January 2025 to May 2025.

**Note: Batch 1 is for the one who wish to apply MSc/PhD Fall 25 with Dec24 deadline.*
